

# PACK TRACK ALUMINIUM

## PACK TRACK

The evolutionary step of a classic - the new Pack Track Aluminium. As the name implies this ultra portable track from Egripment "PACKS" away into two carry bags. The rail carry bag carries up to 12 meters / 40 feet of very durable, lightweight and strong anodized Aluminium track. Another carry bag contains the necessary Polyurethane crossbars. Pack-Track fits together very quickly, the studs of the crossbars matching with the end of the rail sockets. The stainless steel joints are perfect to ensure a smooth and silent travel.

While Pack-Track Alu has been designed for use with portable dollies the structure is such that Pack-Track Alu can easily support heavier loads. Pack-Track is available in curved and straight sections, as a kit consisting of 5 straight and 3 curved Pack Track pieces.

Specifications	Art-Nr: 151/ALU (straight)   152/ALU (curved)
