Managing the batteries

When?

The red LED will light up to signal that the unit has less than 24h of battery left.

***It is recommended to check all units daily and to replace their batteries if needed.**

How?

1. Insert a thin pin (e.g. a paper clip) in the hole on the rear panel and
2. Pull on the panel to unlock it.*
3. Remove, recycle and replace batteries.
4. To close the unit, slide the panel back into place until a “click” can be heard.*

*Opening and closing the panel should require no major force
